SETTING THE STANDARD FOR SECURITY AND PERFORMANCE

9-SERIES REMOTES

Mission Critical Communications

On the world stage, assets are always in motion and intel changes constantly. The need for situational awareness and the ability to mount a fast, effective response are vital. Governments and militaries increasingly rely on satellite communications to connect, coordinate, and command resources in the field.

iDirect Government is already setting the standard for security, performance and efficiency in mission critical IP voice, video and data communications around the globe. And now we're pushing the bar even higher.

Enabling Next-Level Solutions

Introducing the iDirect Government 9-Series remotes—bringing a new level of capability for airborne, maritime and land-based communications.

The 9-Series remotes deliver significant enhancements in every critical area, from improved speed and performance across all bands to advances in form factor for enhanced efficiency, mobility and ease of use. Combined with application-specific engineering and next-level compliance, certifications and capabilities for the highest assurance of security available, 9-Series remotes are elevating satellite communications like never before.

Key Features

NEXT-LEVEL SECURITY

- FIPS 140-2 Level 3 certified
- TRANSEC
- Meets MIL-STD 810G
- WGS Certification ready

ENHANCED PERFORMANCE

- Dramatically increased data rates
- Higher PPS (packets per second) processing
- Make before break connections
- Extended L-Band range
- Multi-image support

IMPROVED EFFICIENCY

- SWaP (Size, Weight and Power)
- Enhanced mobility and ease of use
- Native GPS support
- Web user interface

UNIVERSAL NETWORK SUPPORT

- WGS and HTS
- Defense and commercial networks
- Multicast/Broadcast overlay networks

900

Higher transmission speeds
Dual demodulators
8-Port Gigabit switch

950mp

30% SWaP reduction
Multi-core processor
Dual Gigabit ports

9350

Full featured rack-mounted 900
First iDirect Government remote with LCD display
Zeroize button

980

Designed for ultra-high-speed COTM
Dual demodulators
Extended frequency range

9800 AR

Embedded, full featured 980
1RU form factor
Embedded CPU and Gigabit switch
Operable at 25,000 feet
MIL-STD 810G

9800 AE

Embedded, full featured 980
ARINC 600 4 MCU form factor
Embedded CPU and Gigabit switch
Operable at 55,000 feet
DO-160G

DEFENSE LINE CARDS

DLC-T
Supports one-way TRANSEC
DVB-S2X ready

DLC-R
Supports up to 16 channels
Up to 4x increase in Msp/s
On-board TRANSEC module
